DESCRIPTION

In the new built-up part of the register of Lysica, we are offering for sale a plot of land intended for the construction of family houses or cottages with a total area of 3,369 m2. The land has a sloping character, where a small stream flows along the border, which the future owner can use for his own purposes as utility water. There is an access road leading to the property, which is in the management of the Slovakian land fund. Connection to the electricity network is on the territory of the neighboring property, other utility networks are not available, waste - cesspool, water - well. The land is in triangular shape, on which is possible to build two larger family houses or three smaller holiday cottages. Since the construction of new family houses and cottages is growing here, this location is gaining in attractiveness, which will certainly be reflected on the price of land in the future. We are currently offering the land for the bargain price, so do not hesitate to contact the broker and arrange a tour of the property.
